Adjust the pace size of the Spider Robot

Have fun programming lessons in "Learn Modmi with Me"

Interesting courses Teaching with graphical programming

There are three levels of courses to help users learn ModMi step by step.

Create more personalized ModMi applications in "DIY Creation"

Inspire innovation

DIY Creation

In DIY creation, you can build your own Modmi robot system according to your needs, or start with the official configuration and add desired modules to form a more powerful robot.

Then with various program methods, you can make fun and powerful applications.

With your imagination, the applications are infinite

If you want to further explore the ModMi robot and its applications, various code programming methods can help you to make it.

Develop remote control applications based on master-slave control technology

Explore various applications based on collaborative control technology

More applications wait for your creation

Warning

1. Contains small parts, not suitable for children under 3 years old;
2. Contains precision parts, avoid dropping;
3. Keep your ModMi dry; keep the product away from water;
4. Do not connect multiple control modules together directly or indirectly;
5. Do not remove or replace the built-in battery; please contact our after-sales service team for repairs in case of damage;
6. The robot can only use the recommended charger (recommended specification: output DC 8.4V/1.5A);
7. Do not force the robot to move when it is turn-on and locked;
8. Do not touch the robot with your hands during its movement to avoid crush;
9. Do not carelessly discard it and pollute the environment. Please recycle it properly;
